

Meeting Agenda

Time: 3:00 PM

Date: November 7th, 2019

Location: Dr. Vajda's Office

Corrine Clapp	Makani Mafua	Rose McDonald	Jake Patzer	Jason Torrence
(530)-383-2634	(253)-737-7307	(360)-481-9527	(253)-279-1655	(509)-264-8788
corrine.clapp@cwu.edu	makani.mafua@cwu.edu	rose.mcdonald@cwu.edu	jacob.patzer@cwu.edu	jason.torrence@cwu.edu

Introduction:

This meeting will be used to discuss the various ideas we've brainstormed for the implementation of this project. The below are our ideas:

1. Perform the Haka
2. Follow a specific person in view
3. Read a document held to the camera
4. Using Google APIs for weather, news, etc.
5. Movements:
 - a. Walk in a circle, roll over
 - b. Dog: bark
6. Evaluate expressions
7. Perform http requests (IMDB, Wikipedia, Dictionary, Recipes)
8. Conversation with Alexa smart speaker
9. Use a phone remote control?
10. NES Rob the Robot
 - a. Watch a screen and respond depending upon the image displayed

We'd like to ask the following with our ideas in mind:

- Is this enough functionality to meet the requirements of the project?
- Does anything seem too simple or overly complicated?
- Should we decide something is too complicated, or something new arises that we'd like to implement, can we adjust our plan?
